

Client: **The Manchester College** | Location: **Harpurhey Manchester** | Contractor: **Quarmby Construction**
 Completion Date: **November 2010** | Sector: **Public**

Manchester College in Harpurhey

About the project:

The refurbishment of the old Victorian swimming baths at Harpurhey - Manchester into a state of the art college facility. This project was part new build, part restoration of an existing Grade II listed public baths building to provide new teaching accommodation to supplement the award-winning Rochdale Road 6th Form College.

Project challenges:

The Listed section of the restoration had to be re-instated to it's original state using traditional building techniques whilst utilising modern electrical wiring techniques and technology beneath the surface. Complimented by a modern new build teaching block using energy efficient photocell dimmed lighting and a comprehensive data network.

Services:

Energy Efficiency Scheme	<input type="checkbox"/>
Power Distribution	<input checked="" type="checkbox"/>
Lighting Installation	<input checked="" type="checkbox"/>
Emergency Lighting Installation	<input checked="" type="checkbox"/>
