

Client: **Ms D Ainsworth** | Location: **Rossendale** | Contractor: **William Dyer Electrical UK Ltd**  
Completion Date: **June 2011** | Sector: **Renewable Energy**

## Solar Photovoltaic Installation

### About the project:

A domestic retro-fit 4kw system located in the Rossendale Valley which is in the heart of Lancashire on a true south facing location. The system is installed on a semi-detached bungalow using CNPV 'Black Beauty' panels which give a more aesthetically pleasing finished look.

### Project challenges:

The project had to meet the client's strict demands of maximum benefits and minimum disturbance. Utilising Schletter's fixing system gave us a simple installation. This coupled with the looks of the CNPV panels met our client's demands.

### Services:

Energy Efficiency Scheme	<input type="checkbox"/>
Power Distribution	<input type="checkbox"/>
Lighting Installation	<input type="checkbox"/>
Emergency Lighting Installation	<input type="checkbox"/>
